Corporate Social Responsibility  
Training Courses

## Social Responsibility Solutions

Sustainability is not just about environmental measurement and improvement. Corporate social responsibility encapsulates both environmental and social issues to provide a measure of ethical and sustainable development.

At Intertek, we have developed a comprehensive training programme to equip companies to remain on the cutting edge of new developments within industry and meet their customer requirements and prove due diligence.

Intertek offers CSR training for suppliers, vendors, agents, workers and management in a range of industry programmes including SMETA, SA8000, WRAP, ICTI, BSCI and SIZA.

Technical expertise and continuous training are critical components to high quality social monitoring.
